Product Sheet

Graphics Core	500 MHz
Memory Interface	320 bit
Fill Rate	24 billion/sec
RAMDACs	Dual 400 MHz
Chipset	GeForce™ 8800 GTS
Memory Bandwidth	64 GB/sec

Dual Link DVI - Supporting digital output up to 2560x1600	DUAL
Memory Clock	1.6 GHz
Shader Clock	1188 MHz
Clock rate	500 MHz
Chipset	GeForce 8800 GTS
Memory	640 MB
Bus Type	PCI-E
Memory Type	DDR3
Memory Bus	320 bit
Highlighted Features	SLI ready,TV Out,RoHS,Dual DVI Out,HDCP Ready,HDTV ready

NVIDIA® unified architecture with GigaThread™ technology

Massively multi-threaded architecture supports thousands of independent, simultaneous threads, providing extreme processing efficiency in advanced, next generation shader programs.

NVIDIA® Lumenex™ Engine

Delivers stunning image quality and floating point accuracy at ultra-fast frame rates.

Full Microsoft® DirectX® 10 Support

World’s first DirectX 10 GPU with full Shader Model 4.0 support delivers unparalleled levels of graphics realism and film-quality effects.

Dual 400MHz RAMDACs

Blazing-fast RAMDACs support dual QXGA displays with ultra-high, ergonomic refresh rates--up to 2048x1536@85Hz.

Dual Link DVI

Capable of supporting digital output for high resolution monitors (up to 2560x1600).

NVIDIA® SLI™ Technology
Delivers up to 2x the performance of a single GPU configuration for unparalleled gaming experiences by allowing two graphics cards to run in parallel. The must-have feature for performance PCI Express graphics, SLI dramatically scales performance on over 60 top PC games.
PCI Express™ Support
Designed to run perfectly with the next-generation PCI Express bus architecture. This new bus doubles the bandwidth of AGP 8X delivering over 4 GB/sec. in both upstream and downstream data transfers.
16x Anti-aliasing
Lightning fast, high-quality anti-aliasing at up to 16x sample rates obliterates jagged edges.
NVIDIA® PureVideo™ Technology
The combination of high-definition video processors and NVIDIA DVD decoder software delivers unprecedented picture clarity, smooth video, accurate color, and precise image scaling for all video content to turn your PC into a high-end home theater. (Feature requires supported video software.)
OpenGL™ 2.0 Optimizations and Support
Ensures top-notch compatibility and performance for all OpenGL applications. NVIDIA® nView® Multi-display Advanced technology provides the ultimate in viewing flexibility and control for multiple monitors.
NVIDIA® nView® Multi-Display Technology
Advanced technology provides the ultimate in viewing flexibility and control for multiple monitors.
